

Adobe Acrobat DC for enterprise: sales conversation guide

How to sell Adobe Acrobat DC for enterprise.

The purpose of this guide is to facilitate the sales conversation when positioning Adobe Acrobat DC for enterprise to your business customers. Follow these four steps to get the most out of your sales calls.

Target customer: Adobe Cumulative Licensing Program (CLP) and Transactional Licensing Program (TLP) customers with large installments of Acrobat software; Adobe Creative Cloud customers up for renewal with 100 or more seats of Acrobat perpetual in their organization; Microsoft Office 365 customers.

Four steps to help businesses make the best decision:

1 Discover customer needs.

Do your due diligence to understand the customer. Uncover their pain points, licensing needs, and goals by asking the right questions. For a sample list of discovery questions, view the video [For a sample list of discovery questions, download the Discovery Form](#) and view the video [Choosing the right version of Acrobat for your customer](#).

What to look for:

More than 100 licenses of Acrobat plus dedicated IT infrastructure.

[Go to step 1 >](#)

2 Position the offer.

Educate the customer on the benefits of an enterprise license. Key pillars to focus on are advanced license management capabilities, 24x7 dedicated enterprise-grade support, and flexible purchasing options with volume discounts.

What to say:

"Let me tell you more about Acrobat DC for enterprise and how it can benefit your business..."

[Go to step 2 >](#)

3 Answer concerns.

Listen to the customer and assess whether the Acrobat DC for enterprise value pillars resonate with them. If not, understand what their concerns are and help them choose the right solution.

What to ask:

"Do you have any questions you need answered to help you make a decision?"

[Go to step 3 >](#)

4 Ask for the order and cross-sell.

Gain a commitment from the customer and discuss next steps in the purchasing process. Then identify other products the customer may need.

What to say:

"Let's talk about the best way for you to license all your Adobe products..."

[Go to step 4 >](#)

Key takeaway: Preparation is key. Understand your customer and guide them to the right Adobe product offerings.

1 Discover customer needs.

Discovery checklist:

Determine your customer's goals

- Determine your customer's licensing needs, challenges, and what they want to achieve.
- Refine and adjust their goals to be specific, measurable, and attainable.

For a list of discovery questions, download the [Discovery Form](#), then view [this video](#).

Understand your customer's footprint

- Look at their purchase history of Acrobat licenses.
- If they have more than 100 licenses and have an enterprise infrastructure, lead with the enterprise offering.

Understand your customer's business environment

- Do an online search of the business and industry to understand what's top of mind for them strategically.
- Are they launching new products? Entering new markets? Facing increased competition?

Identify decision-makers and influencers in the organization

- Start with your own databases and CRM resources to understand who will need to be involved.
- Also search on LinkedIn to identify new stakeholders you may want to engage.

Key takeaway: Understand your customer to determine which offering you will lead the conversation with.

Acrobat DC has two business offerings to support organizations. For small to medium businesses, Acrobat DC for teams makes deployment hassle-free with the Admin Console, provides user authentication through Adobe IDs, and includes free 24x7 technical support. For midsize to large organizations, Acrobat DC for enterprise offers all that and more, including stronger authentication via Federated ID with Single Sign-On (SSO) and deeper IT support.

Small to midsize businesses and departments

Midsize to large organizations and departments

Acrobat DC for teams	Acrobat DC for enterprise
Service configurability	
• Access to Acrobat Standard DC or Acrobat Pro DC and PDF services	• Access to Acrobat Standard DC or Acrobat Pro DC plus the ability to manage product configuration at a product or user level, including PDF services and storage
Deployment and management	
Manage licenses and users through the web-based Admin Console: • Assign licenses to multiple users with product-specific deployment tools • Individually remove users and assign or reassign licenses • Centralize IT deployment	Manage licenses and users through the web-based Admin Console. Get team management capabilities, <i>plus</i>: • Securely integrate with existing corporate identity systems with Federated ID with SSO • Remove, assign, and reassign licenses individually, by group, or by product • Turn PDF services on or off by user, group, or product
Security	
• TLS (HTTPS) encryption for assets in transit • At-rest encryption • Company-owned licenses • User authentication via Adobe ID	Teams-level security, <i>plus</i>: • User authentication via Federated ID with SSO or Enterprise ID (if enabled) • Dedicated encryption key for at-rest assets
Customer support	
• Advanced support for IT administrators • Live chat and forums • End-user tutorials	Teams-level support, <i>plus</i>: • Dedicated onboarding phone call support for IT admins • Enterprise 24x7 support with experts in licensing and deployment • Ability to open and track support cases from the Adobe Admin Console • Unlimited Expert Services sessions

2 Position the offer.

Who are you talking to and what do they care about?

Information technology (IT) professionals: IT administrator, IT manager, IT director, or desktop support manager

- Streamline software management
- Control software access and deployment
- Protect assets and documents with enterprise-grade network and data security
- Integrate new technology in existing infrastructure
- Support mobile workforce productivity and manage security
- Want dedicated enterprise support

Why Acrobat DC for enterprise?

Enterprise-grade security

Securely integrate with existing corporate identity systems with Federated ID with SSO or Enterprise ID (if enabled) and advanced encryption when assets and data are both in transit and at rest. Get a dedicated encryption key upon request. Integrate into existing directory systems for advanced user management and security.

Advanced license management capabilities

Get advanced user identity management and increased control over your company IP with the web-based Admin Console. Assign, reassign, and remove licenses individually or by group. Turn PDF services on or off by user, group, or product. Always get the latest features and updates to deploy on your own schedule—at no additional cost.

Dedicated enterprise support

Get up and running fast with dedicated onboarding help and unlimited 24x7 phone and email technical support. Administrators can open and check the status of their support cases right from the Admin Console.

Flexible purchase options

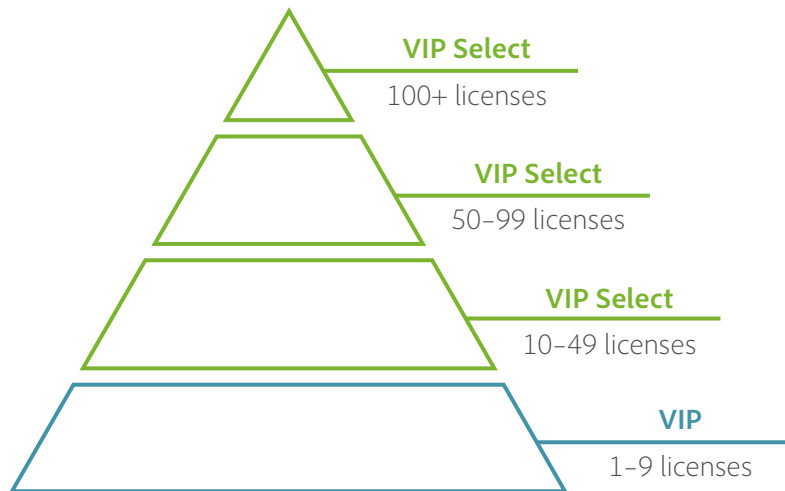

Take advantage of flexible transactional purchasing and volume discounts without long-term contracts when purchasing through the Value Incentive Plan (VIP).

3 Answer concerns about Acrobat DC for enterprise.

Concern	Response
<i>"I need a PDF solution that can be easily and securely integrated with Microsoft Office 365."</i>	Deploying and managing Acrobat and PDF services is simple using Office 365 Admin tools. You can even use a web-based installer to configure your Office 365 accounts without installing additional software on users' desktop machines. Your business critical documents stay secure with Office 365 cloud security, and users no longer need to download documents from SharePoint and OneDrive to convert, manipulate or even password protect PDF files which means you don't have to worry about sensitive documents being kept on unsecured computers.
<i>"I want to own my software."</i>	One of the biggest advantages to upgrading to Acrobat DC for enterprise is streamlined software management and deployment. You can easily assign, reassign, remove, and track user licenses individually, or by group, through the web-based Admin Console. Plus, you'll always get the latest features/upgrades (that can be deployed on your own schedule) at no additional cost. Acrobat DC for enterprise also offers transactional purchasing without requiring long-term contracts. And by purchasing Acrobat DC and other Adobe products together in one VIP agreement, you can maximize savings and manage all of your subscriptions in one convenient place.
<i>"I don't trust cloud offerings, so why should I trust Acrobat DC?"</i>	Adobe Document Cloud services are hosted on Amazon Web Services (AWS), a state-of-the-art, major cloud platform that follows all required standards. All content is redundantly stored in multiple data centers and on multiple devices in each data center. All network traffic undergoes systematic data verification and checksum calculations to prevent corruption and ensure integrity. Finally, stored content is synchronously and automatically replicated to other data center facilities within that customer's region so that data integrity will be maintained even with the loss of data in two different locations. Acrobat DC for enterprise also offers added levels of protection relative to Acrobat DC for teams, such as Federated ID with Single Sign-On (SSO), since the customer owns the data and can receive a dedicated encryption key from AWS to further protect their assets at rest.
<i>"Acrobat DC for enterprise is more expensive than alternatives (like perpetual or competitive solutions)."</i>	Acrobat DC for enterprise is the only complete PDF workflow solution, and it provides the highest levels of security and control, including advanced user management and increased control over company IP. Volume discounts start at 10 licenses, and if you purchase Acrobat DC with other Adobe products, such as Creative Cloud, in a single VIP agreement, you can maximize savings by qualifying for even greater volume discounts. Also, when you purchase by subscription, you'll get all new features/updates as soon as they're released without having to pay more.
<i>"I don't meet the threshold for an enterprise solution."</i>	There's no minimum to purchase Acrobat DC for enterprise as long as you have the IT infrastructure required for an enterprise deployment. Plus, volume discounts start at 10 licenses, and by purchasing through VIP, you can combine Acrobat DC licenses with other Adobe product purchases to maximize savings.
<i>"What is 'IT infrastructure'?"</i>	IT infrastructure includes components like hardware, software, network, and dedicated human resources to set up and administer core IT services within the organization—like enterprise identity management. Adobe has an enterprise onboarding team that is committed to working with your IT department to help you manage users via the web-based Admin Console. If you're implementing Federated ID with Single Sign-On (SSO), we'll walk you through that process as well. We also provide 24-hour enterprise support by phone.
<i>"I need a solution with support for virtual environments."</i>	Acrobat DC supports the following virtualization platforms: Citrix XenApp, Citrix XenDesktop, VMware Horizon, Microsoft App-V, and Microsoft Windows Terminal Server (WTS).

4 Ask for the order and cross-sell.

VIP discount levels—for teams

1-Year term	License quantity	Discount	Membership status
4	100+	10%	VIP Select
3	50-99	10%	VIP Select
2	10-49	5%	VIP Select
1	1-9	None	VIP

3-Year commit*	License quantity	Discount	Membership status
14	100+	15%	VIP Select
13	50-99	15%	VIP Select
12	10-49	10%	VIP Select
1	1-9	None	VIP

* Education members are not eligible for discount levels 12-14, but may accept a 3-year commit.

Help members get the best discounts.

Cross-sell Creative Cloud with Acrobat DC to qualify for VIP Select. Members can combine Acrobat DC and other Adobe product licenses to meet the quantity requirements at each level. Plus, joint purchasing also means managing both offerings under a single contract. Qualify for higher discounts with a single qualifying transaction, or through a look-back that happens right before the renewal period.

Ask for a 3-year commit. Teams members can save an extra 5% per license by committing to a defined license quantity at a set price for up to 3 years. Enterprise members enjoy the same benefits plus an extra 10% off per license compared to a 1-year term.

VIP discount levels—for enterprise

1-Year term	License quantity	Discount	Membership status
4	100+	15%	VIP Select
3	50-99	10%	VIP Select
2	10-49	5%	VIP Select
1	1-9	None	VIP

3-Year commit*	License quantity	Discount	Membership status
14	100+	25%	VIP Select
13	50-99	20%	VIP Select
12	10-49	15%	VIP Select
1	1-9	None	VIP

* Education members are not eligible for discount levels 12-14, but may accept a 3-year commit.
