November 2, 2016

Dear SINET Community,

Welcome and thank you for being a part of our community as we congratulate this year's class of SINET 16 Innovators who are shaping, influencing and impacting the future of the Cybersecurity domain. We are proud and excited to provide a platform for this year's class to present their solutions.

Of all our programs, the Showcase is my favorite. The advancement of innovation in its' most simplest form is just having awareness that technologies exist in order to better society and the Showcase exemplifies this spirit. The day is designed to help the small business community have their voice heard on stage in order to accelerate their innovative solutions into the marketplace. I encourage you to meet these entrepreneurs and learn how they are solving difficult problems.

Although company valuations have calmed down and there has been a cooling off relative to investments, the Cybersecurity business continues to flourish. The number of investments within the DC, Maryland and Virginia region has never been busier with financing doubling from 14 to 28 over a four-year period ending in 2015. The situation in Cyber continues to manifest itself and is clearly driving the need for greater investment, superior innovation and increased awareness of advanced technologies in order to stay ahead of the adversary.

I am grateful to our esteemed steering committee, Dr. Douglas Maughan and The Department of Homeland Security Science & Technology Directorate for their continued support of our mission and the small business community. I also would like to thank our sponsors and speakers who contributed greatly to making today's Showcase a success.

As we continue to embrace change and lead change let us not forget that only when we take risk can we truly alter the world.

Sincerely,

A handwritten signature in black ink, reading "Robert D. Rodriguez". The signature is fluid and cursive, with a long, sweeping underline.

Robert D. Rodriguez
Chairman and Founder
Security Innovation Network

SINET Showcase & Workshops 2016

WEDNESDAY & THURSDAY
NOVEMBER 2 & 3, 2016

Day 1 Workshops Agenda

Wednesday, November 2

12:00 P.M.

Registration

1:00 P.M. — 1:55 P.M.

Workshop Tracks

TRACK A: 1:00 P.M. — 1:55 P.M.

FIRST AMENDMENT

Can Blockchain Be Trusted Both Technologically And Operationally And Will It Ever Mature From The Experimentation Phase?

Abstract: There has been a lot of talks on blockchain being the holy grail providing a trusted ledger from tracking fine art to trade settlement. Even most of the technologists and commentators do not realize the trust does not apply to the data itself. Blockchain will merely provide an immutable recording of what has been input, it does not give your extra confidence in whether the record is correct in the first place. In this panel discussion, we will explore the readiness of the technology and extra security measures one has to deploy for mission critical implementations.

Moderator:

- **Indu Kodukula**, Chief Information Security Officer, Intuit

Panelists:

- **Devon Bryan**, Executive Vice President and Chief Information Security, The Federal Reserve System
- **Andersen Cheng**, Co-Founder & Chief Executive Officer, Post-Quantum
- **Loretta Joseph**, Director of Market Development, Sydney Stock Exchange and the Australian Fintech Leader of the year
- **Susan Ramonat**, Chief Risk Officer, SEI
- **David Shrier**, Managing Director, Connection Science | New Ventures Officer, Sloan School of Management, Massachusetts Institute of Technology

TRACK B: 1:00 P.M. — 1:55 P.M.

HOLEMAN LOUNGE

DIUX, DHS S&T And Other Tech Accelerators That Are Advancing Innovation Into The Public And Private Markets

Abstract: As criminal organizations and state-sponsored hackers continue to penetrate our network defenses, senior government officials, C-suite executives and the general public are demanding faster innovation from their security providers. Keeping pace with a well-funded adversary requires solution providers to streamline the insertion of innovative technologies into their existing and emerging platforms. However, much of the innovation in security is coming from geographic ecosystems that are different than what are considered to be traditional centers of information technology innovation. This dislocation slows the insertion of innovative security approaches into the existing supply chain.

Moderator:

- **Alberto Yopez**, Managing Director, Trident Capital Cybersecurity

Panelists:

- **James (Jay) DeLong**, Managing Partner, SixThirty CYBER Fund
- **Rick Gordon**, Managing Partner, Mach37
- **Doug Maughan**, Director, Cyber Security Division, Department of Homeland Security Science & Technology Directorate
- **Charles Nelson**, U.S. Cyber Command, Capabilities Development Group Deputy Director for Outreach
- **(Ret) Major General Robert Wheeler**, Senior Advisor, DIUx

2:00 P.M. — 3:00 P.M.

Workshop Tracks

TRACK A: 2:00 P.M. — 3:00 P.M.

FIRST AMENDMENT

Deep Network Orchestration and Visibility —You Can't Secure What You Can't See

Abstract: From highly sophisticated Cyberattacks to garden variety malware, how we defend what's connected to our network when the perimeter becomes undefined and continues to shift. In the changing network paradigm, gathering data about what's connected to it and summarizing the information to defend the users, or do we still need a back door to strong cryptography that enables access to all the devices?

This panel will explore use of meta data and reputation scores to secure networks and systems in the world of evolving network designs, byod, IoT and strong cryptography.

Moderator:

- **Simon Gibson**, Chief Information Security Officer, Gigamon

Panelists:

- **Brian Barrios**, Director for National Cybersecurity Federally Funded Research and Development Center, MITRE
- **Taher Elgamal**, Chief Technology Officer, Salesforce.com
- **Tim Hwang**, Public Policy Lead – Artificial Intelligence, Google
- **Dr. Ronald Ritchey**, Managing Director & Chief Cyber Architect, JPMorgan Chase & Co.

TRACK B: 2:00 P.M. — 3:00 P.M.

HOLEMAN LOUNGE

How To Enter, Understand And Increase Revenues Within The Federal Market

Abstract: Federal Cyber Security Market—Who, What, Where, Why, and How.

Executives, managers, and business development/sales people need to understand the Federal market and its unique characteristics. The Federal market is NOT like the commercial market and expectations need to be managed appropriately. Current and former government buyers and experienced Federal sales people will be part of a candid discussion about how to conduct business development and sales in the Federal market.

Moderator:

- **John Mills**, Director, Cybersecurity Policy, Strategy, and International, Office of the Deputy CIO for Cybersecurity

Panelists:

- **Ann Barron-DiCamillo**, Chief Technology Officer, Strategic Cyber Ventures, LLC
- **Blair Heiserman**, Head of Managed Desktop and Mobile Teams, National Institute of Standards and Technology
- **Justin Taft**, President & Chief Executive Officer, The Soter Group
- **Bryan Ware**, Chief Executive Officer, Haystax

3:00 P.M. — 3:30 P.M.

Break

3:30 P.M. — 4:25 P.M.

TRACK A: 3:30 P.M. — 4:25 P.M.

FIRST AMENDMENT

Integrating SINET16 Innovators Into Your Infrastructure

Abstract: Taking relatively young solution providers and integrating them into a complex and large Government infrastructure. Walking the journey from their initial presentation on stage at the SINET Showcase to becoming fully integrated into a large organization. This panel will discuss the challenges and lessons learned from this entire process to include overcoming scalability and throughput challenges.

Moderator:

- **Greg Crabb**, Chief Information Security Officer, US Postal Service

Panelists:

- **Anup Ghosh**, Founder & Chief Executive Officer, Invincea
- **Doug Glair**, Manager of Cybersecurity Engineering, US Postal Service
- **Robert Oates**, Manager, Technology Infrastructure Portfolio, US Postal Service
- **Alex Ostrowski**, Director of Channel Management, Agari
- **Derek Smith**, Co-Founder & Chief Executive Officer, Shape Security

TRACK B: 3:30 P.M. — 4:25 P.M.

HOLEMAN LOUNGE

Orchestration And Automation, How Far Can We Go?

Abstract: In an effort to speed incident response processes a number of vendors have started to bring to market solutions that enable orchestrated or automated security alert handling. This panel will explore the importance and relevance of these solutions in the emerging market, answering questions such as:

- How far can automation go? Is fully automated remediation possible? If so how, if not what are the limits?
- Do you see security alerts and workload in your environment increasing, decreasing, or staying the same? To what extent are these solutions addressing a gap/failure created by SIEM vendors and other systems in the security stack to identify relevant alerts or?
- How important are solutions like these to a Fortune-500 SOC? Will the offerings have relevance in the mid-market?
- If humans are still required, how do you think about the integration of automated solutions with people - what links or ties human and machine processes together?
- How does the rapid evolution of the IoT impact thinking about orchestration and automation?
- Beyond orchestration and automation what's next? Will these offerings evolve into a distinct market or remain a niche capability in the enterprise offering space?

Moderator:

- **John Petrik**, Editor, The Cyberwire

Panelists:

- **John Jolly**, Vice President, Customer Success, Syncurity
- **Shaun Khalfan**, Chief Information Security Officer, U.S. Customs and Border Protection, Department of Homeland Security
- **Joseph Loomis**, Chief Strategy Officer, CyberSponse, Inc.
- **Phil Quade**, Special Assistant to Director NSA for Cyber and Director, NSA Cyber Task Force

4:30 P.M.—5:30 P.M.

TRACK A: 4:30 P.M.—5:30 P.M.

FIRST AMENDMENT

The Near Future Of Technology: What The Enterprise CISO Needs To Know

Abstract: The future of information technology is being shaped by seven megatrends: Cloud Computing, Artificial Intelligence, Mobility, Big Data, Robotics, Internet of Things and Cybersecurity. This panel, moderated by the publisher of CTOvision.com Bob Gourley, will examine these trends from the perspective of the enterprise CISO, producing actionable insights you can use to reduce risk while enhancing your ability to leverage the latest technologies in support of your business and mission needs.

Moderator:

- **Bob Gourley**, Partner, Cognito Corp

Panelists:

- **Craig Davies**, Director of Security, Atlassian
- **Dennis Gilbert, Jr.**, Director, Cyber and Information Security, Exelon
- **Rodney Joffe**, Senior Vice President & Fellow, Neustar
- **Jim Jones, PhD**, Associate Professor, George Mason University

TRACK B: 4:30 P.M.—5:30 P.M.

HOLEMAN LOUNGE

Privilege Access Intelligence Leveraging User Behavior Analytics

Abstract: Privilege access abuse is often a top use case for user and entity behavior analytics (UEBA) however it begins with first knowing what is privilege access and what has been granted and what privilege users are doing with this access in order to monitor abuses. This is also known as discovery, and both IAM and PAM solutions have been challenged with closing this gap. Legacy methods of tracking privilege accounts include prefixes, tags and access management solutions providing reports. The challenge is these methods likely track less than 50% of privilege access and may not include entitlements within accounts. Identity Analytics (IdA) is machine learning from big data to provide a dynamic, context aware risk-based approach to complement access management. To detect privilege access abuses with UEBA, one must learn all privilege access down to the entitlement level with IdA. This provides a risk-based approach to remove excess access, provide risk-based certifications in order to gain a full understanding of privilege access and activity to close the gap. This panel will discuss the implications of UEBA and IdA in respect to machine learning providing privilege access intelligence.

Moderator:

- **Hank Barry**, Partner, Sidley Austin LLP

Panelists:

- **Peter Gouldmann**, Director, Office of IT Security Compliance Directorate of Information Assurance Bureau of Information Resource Management U.S. Department of State
- **Gary Harbison**, Chief Information Security Officer, Monsanto
- **Dr. Kevin McNeill**, VP Engineering & Chief Scientist, BAE Systems
- **Saryu Nayyar**, Chief Executive Officer, Gurukul

5:30 P.M.

Workshops Conclude

Day 2 Showcase Agenda

Thursday, November 3

7:30 A.M. — 8:30 A.M.

Registration and Continental Breakfast

Holeman Lounge

8:30 A.M. — 5:30 P.M.

General Session

Ballroom

8:30 A.M. — 8:40 A.M.

Introductory Remarks by Showcase Host

- **Rick Geritz**, Chief Executive Officer, LifeJourney

8:40 A.M. — 8:45 A.M.

Opening Remarks

- **Robert D. Rodriguez**, Chairman & Founder, SINET

8:45 A.M. — 9:10 A.M.

Fireside Chat with Robert Rodriguez

Special Guest:

- **Taher Elgamal**, Chief Technology Officer, Salesforce.com

Abstract: Internet Security veteran, Taher Elgamal, sits down with Robert Rodriguez to discuss some of the industry insights gained as an innovator, entrepreneur, executive and board member.

9:10 A.M. – 10:00 A.M.

DoD Initiatives and Priorities, Today and Moving Forward

Abstract: This panel will discuss: 1) The Joint Information Environment (JIE), Joint Regional Security Stacks (JRSS), mission partner environment (MPE); working closer with our international mission partners and allies.

2) Future of DoD Cloud; ensuring cyber hygiene; platform cybersecurity (aircraft, ships, tanks, medical equipment); collect better metrics through machine to machine and automation and orchestration; adding Cybersecurity to legacy IT systems; the DOD Rapid Innovation Fund is looking across the board enterprise wide for commercial solutions that may be a good fit for the DOD. This fund can allocate up to 3 million dollars per company per project and the successful solutions can then potentially become full acquisition programs, to be brought into a DOD infrastructure that has over 5 million users. Finally exploring miniature mobility; smaller power supplies with longer lasting batteries that will lighten the load for the warfighter.

Moderator:

- **Tom Patterson**, Chief Trust Officer, Unisys

Panelists:

- **Lieutenant General William J. “Bill” Bender**, Chief of Information Dominance and Chief Information Officer, Office of the Secretary of the Air Force
- **Lieutenant General Robert S. Ferrell**, Chief Information Officer/G-6, U.S. Army
- **Barbara Hoffman**, Principal Director, Deputy Chief Information Officer for Information Enterprise, U.S. Department of Defense

10:00 A.M. – 10:05 A.M.

Introduction to SINET 16 Innovators

- **Dr. Douglas Maughan**, Director, Cyber Security Division, Department of Homeland Security Science & Technology Directorate

10:05 A.M. – 10:30 A.M.

SINET 16 Innovators Present

- **Bob Graham**, Chief Executive Officer & Founder, Blackridge Technology
- **Jeff Williams**, Chief Technology Officer & Co-founder, Contrast Security
- **Omer Schneider**, Chief Executive Officer, CyberX
- **Mike Flouton**, Vice President of Marketing, DataVisor

10:30 A.M. – 10:55 A.M.

Break and Company Exhibits Open

10:55 A.M. – 11:40 A.M.

Information Sharing In A Connected And Complex World

Abstract: Our Cyber adversaries continue to attack in more sophisticated and frequent ways and it is imperative that the public and private sectors work towards the development of trusted information sharing models and communities in order to keep pace with these dynamic attacks. An essential part of any organization and agency is to provide their employees a trusted place to share information about current and future threats. This panel will share experiences where industries went from whispering about cybersecurity concerns locally to having robust, completely secure communities and models that enable them to discuss threats with their peers worldwide. Panelists will examine how this happens, how it improves the Cybersecurity practices of organizations within this industry, and what you can do to support your mission needs.

Moderator:

- **Robert Silvers**, Assistant Secretary for Cyber Policy, U.S. Department of Homeland Security

Panelists:

- **David Hahn**, Vice President & Chief Information Security Officer, Hearst Corporation
- **Kshemendra Paul**, Program Manager, Information Sharing Environment
- **Chris Porter**, Vice President & Chief Information Security Officer, FannieMae
- **Marcus Sachs, P.E.**, Senior Vice President & Chief Security Officer, North American Electric Reliability Corporation
- **Adam Vincent**, Chief Executive Officer, Threat Connect

11:40 A.M. – 12:05 P.M.

SINET 16 Innovators Present

- **James Chappell**, Co-Founder & Chief Technology Officer, Digital Shadows
- **Dale Quayle**, President & Chief Executive Officer, Interset Software, Inc.
- **Gautam Altekar**, Co-founder & Chief Architect, Menlo Security
- **Lance Cottrell**, Chief Scientist, Passages

Networking Luncheon Table Hosts

SINET Connects: Networking Luncheon

FIRST AMENDMENT ROOM, WHITE/MURROW ROOM, AND FOURTH ESTATE DINING ROOM

Maximize this 70-minute luncheon by sitting down in an informal and intimate setting with distinguished security thought leaders and experts. Topics will focus on how solution providers can best shape their business strategies to meet the needs of the market.

- **Table #1: Alex van Someren, General Partner, Amadeus Capital Partners**
Topic: Cybersecurity across the Pond: building US/UK bridges
- **Table #2: Paula Fetterman, Vice President, Information Security Manager, T. Rowe Price**
Topic: Vendor Management – Lessons learned from being too deep in the weeds
- **Table #3: Lin Lu, Chief Risk Officer- IT, Enterprise Risk Management, Freddie Mac**
Topic: Insider Risk
- **Table #4: Tom Patterson, Chief Trust Office, Unisys**
Topic: Cyber Technologies for Critical Infrastructure Protection
- **Table #5: Alberto Yopez, Managing Director, Trident Capital Cybersecurity**
Topic: TBD
- **Table #6: Mark Connelly, Chief Information Security Officer, The Boston Consulting Group**
Topic: How to Make Information Security a Value Add to the Business
- **Table #7: Nick Shevelyov, Chief Security Officer, Silicon Valley Bank**
Topic: Horses for Courses, considerations for customizing your cyber security program
- **Table #8: Justin Taft, President & Chief Executive Officer, The Soter Group**
Topic: How to do business with the Federal government
- **Table #9: Dmitri Alperovitch, Co-Founder & Chief Technology Officer, CrowdStrike**
Topic: Evolution of Endpoint Security
- **Table #10: David Hahn, Vice President & Chief Information Security Officer, Hearst Corporation**
Topic: Examining the growing and persistent problem of Online Ad-Fraud and “Malvertising”
- **Table #11: Dan Dagher, Cybersecurity Strategy, U.S. Department of Defense CIO**
Topic: DoD Rapid Innovation Fund Program
- **Table #12: Chris Painter, Coordinator of Cyber Issues, Department of State**
Topic: TBD
- **Table #13: John Scimone, SVP and Global Chief Information Security Officer, Sony**
Topic: Preparing for Destructive Cyber Attacks
- **Table #14: Tim Hwang, Research Director, Pacific Social**
Topic: Socialbots, Cognitive Security, and the Future of Social Engineering
- **Table #15: Greg Crabb, Chief Information Security Officer, U.S. Postal Service**
Topic: Best practices in prioritizing security investments to safeguard your company’s information and technology assets
- **Table #16: Taher Elgamel, Chief Technology Officer, Salesforce.com**
Topic: The Future of Cryptography and Standards

1:15 P.M. – 1:30 P.M.

SINET Thinks Forward With Francois Lavaste

Abstract: Cybersecurity and Time. Why standing still is not an option! Benjamin Franklin said : “You may delay, but time will not.” and it seems today one could instead say: “You may not delay, as cyber attackers will not.” Francois will share his perspective on the importance of TIME in the Cybersecurity world.

- **Francois Lavaste**, Chief Executive Officer, Airbus DS Cybersecurity

1:30 P.M. – 1:55 P.M.

SINET 16 Innovators Present

Abstract:

- **Andersen Cheng**, Chief Executive Officer, Post-Quantum
- **Dave Erickson**, Director of Solutions Architecture, Prelert
- **Gene Stevens**, Chief Technology Officer & Co-founder, ProtectWise
- **Srinivas Mukkamala**, Chief Executive Officer, RiskSense

1:55 P.M. – 2:40 P.M.

What Direction Are Nation State Attacks Trending Towards?

Abstract: In the last 6 months, we have witnessed the unprecedented attempts by the Russian government to influence this election via an information operations campaign targeted at the DNC, the Clinton Campaign and other political entities. At the beginning of this year, the U.S. government indicted Iranian operatives who had been responsible for a multi-year attack on the U.S. Financial Sector. Last month, a large scale Denial of Service attack had temporarily shut off access to some of the biggest Internet sites. These attacks are getting more and more insidious by the day, while the stakes are also getting higher. Join an illustrious panel of experts from government and industry who will discuss what can be done to reverse this trend and keep cyberspace secure for us and future generation.

Moderator

- **James Lewis**, Senior Vice President & Program Director, Center for Strategic & International Studies

Panelists:

- **Dmitri Alperovitch**, Co-Founder & Chief Technology Officer, Crowdstrike
- **Aaron Hughes**, Deputy Assistant Secretary of Defense for Cyber Policy, United States Department of Defense
- **Penny Lane**, Vice President, Payment Fraud Disruption, Visa
- **Jeffrey Lunglhofer**, Chief Information Security Officer, BNY Mellon
- **Chris Painter**, Coordinator of Cyber Issues, US State Department

2:40 P.M. – 3:00 P.M.

SINET Thinks Forward with Alex van Someren

Abstract: Cybersecurity across the Pond: a European perspective

- **Alex van Someren**, General Partner, Amadeus Capital Cybersecurity

3:00 P.M. – 3:25 P.M.

Break and Company Exhibits Open

3:25 P.M. – 3:50 P.M.

SINET 16 Innovators Present

- **Oliver Friedrichs**, Chief Executive Officer & Founder, PhantomCyber
- **Guy Bejerano**, Chief Executive Officer & Co-founder, SafeBreach
- **John Czupak**, Chief Executive Officer, ThreatQuotient
- **Ajay Arora**, Chief Executive Officer & Co-founder, Vera

3:50 P.M. – 4:35 P.M.

Cybernomics: Security Risk Ops, Tying Security and Risk Into Business Operations

Abstract: Measuring economic security investment effectiveness using metrics.

Moderator:

- **William Varner**, President, Mission, Cyber & Intelligence Solutions Group, ManTech International Group

Panelists:

- **Adam Isles**, Principal, The Chertoff Group
- **Lin Lu**, Chief Risk Officer-IT, Enterprise Risk Management, Freddie Mac
- **John Scimone**, Senior Vice President & Global Chief Information Security Officer, Sony
- **Nick Shevelyov**, Chief Security Officer, SVB Financial

4:35 P.M. – 5:20 P.M.

What Does The Future Of The Internet Look Like And How Are We Going To Protect It

Abstract: The Internet is transforming more rapidly than anyone could have imagined. Today's Internet is enabling cloud computing and at the same time connecting everything from airliners to bedroom slippers. How will this vast array of devices and computing capability be protected from cyber criminals, and despots? Clearly, the current strategy and technology has had minimal impact on the trajectory of malicious activity. What are potential opportunities in governance, technology and implementation that could alter the status quo?

Moderator:

- **Jerry Archer**, Senior Vice President & Chief Security Officer, Sallie Mae

Panelists:

- **Mark Connelly**, Chief Information Security Officer, The Boston Consulting Group
- **Kirstjen Nielson**, President, Sunesis Consulting LLC
- **Jeffery Schweitzer**, Chief Innovation Architect, Verizon
- **Major General Sarah E. Zabel**, Vice Director, Defense Information Systems Agency

5:20 P.M. – 5:30 P.M.

Closing Remarks and SINET 16 Recognition

- **Robert D. Rodriguez**, Chairman & Founder, SINET

5:30 P.M. – 7:30 P.M.

SINET Connects: Networking Cocktail Reception & SINET 16 Company Exhibits

SINET 16 Innovators 2016

SINET 16 Innovators 2016

BlackRidge provides an identity-based network and cyber security solution that authenticates identity and applies policy on the first packet of network sessions. This provides a new level of real-time protection that cloaks and protects servers, segments networks, and provides identity attribution.

Contrast Security provides continuous protection of enterprise applications and services against both vulnerabilities and attacks. Contrast uses "deep security instrumentation" for unprecedented speed, accuracy, coverage, & scalability without experts or SLC changes. Think "New Relic for Security."

CyberX secures the Industrial Internet, providing real-time detection and deep insight into control systems' vulnerabilities while ensuring business and operational continuity. With field-proven technology and accredited research, CyberX protects dozens of major industrial sites worldwide.

DataVisor is the only online fraud detection service utilizing unsupervised big data analytics to identify attack campaigns before they conduct any damage to consumer-facing online services.

Digital Shadows provides cyber situational awareness, through our SearchLight platform, which provides truly relevant, contextual intelligence and protects organizations against cyber attacks, loss of intellectual property, and loss of brand integrity by providing them an "attacker's eye view."

Interset provides an intelligent, accurate threat-detection solution. Interset detects threats through machine learning and advanced analytics running on a big-data platform, either on premise or in the cloud.

Menlo Security protects organizations from cyber attacks by eliminating the threat of malware from Web and email with its patented Isolation Platform that easily scales for any size organization and requires no end point software, making it simple and cost effective to deploy.

Passages provides a secure virtual browser that protects enterprises from all web-based attacks. By isolating browsing activity from the local computer and network, users can access any website and follow any link without the risk of infecting their machines or company infrastructure.

Phantom is a security automation & orchestration platform that integrates existing security products to provide a layer of “connective tissue” between them. Phantom executes digital playbooks to achieve in seconds what may take hours to accomplish with the horde of products enterprises use daily.

Post-Quantum is a science-driven UK company with a mission to protect the world's data by deploying secure and innovative authentication, communications, encryption and access technologies. Our modules are ready for use today, but will remain strong in the future, even with quantum computer threats.

Prelert provides behavioral analytics for IT security, IT operations and business operations teams. It analyzes massive amounts of log data, finds anomalies, links them together and lets the data tell the story behind advanced security threats, IT performance issues and business disruptions.

ProtectWise™ is disrupting the security industry with its network security platform, that captures high fidelity network traffic, creates a lasting memory for the network, and delivers real time and retrospective alerting and analysis in a rich, innovative visualizer.

RiskSense is the leader in cyber risk management. We enable organizations to reveal cyber risk, quickly orchestrate remediation, and monitor the results. This is done by contextualizing internal security intelligence, external threat data, and business criticality across a growing attack surface.

SafeBreach is a pioneer in continuous security validation. Our groundbreaking platform simulates breach methods with an extensive and growing Hacker's Playbook™ of research and real-world investigative data to provide a “hacker's view” of an enterprise's security posture.

ThreatQuotient provides ThreatQ, a threat intelligence platform that centrally correlates unlimited external sources with internal security solutions for contextual, operationalized intelligence in one easy to comprehend view to help customers tailor indicators of compromise to their industry.

Vera is an enterprise data security and information rights management company that allows IT to secure, track and audit any type of digital information. With Vera, security and policy travels with the data, so enterprises can maintain visibility and control over who can access sensitive information.

The background features a light gray abstract design. It consists of several overlapping circles of varying sizes and several short, straight line segments. These elements are arranged in a way that suggests a network or a molecular structure. The central circle is the largest and contains the word "Speakers".

The background features a network of large, light-gray circles of varying sizes. These circles are interconnected by thin, light-gray lines, creating a web-like structure. The central circle is the largest and contains the text 'SINET Mission'. Other circles are positioned around it, some partially visible at the edges of the frame.

SINET Mission

SINET Mission

Advance innovation and enable global collaboration between the public and private sectors to defeat Cybersecurity threats.

ABOUT SINET

SINET is a “super connector.” We provide a series of platforms for the business of Cybersecurity to take place within the global ecosystem of the entrepreneur including venture capital, investment banking, system integration, academia, science, legal, policy, and industry as well as Government intelligence, military and civilian departments and agencies.

Our programs consistently attract the highest level of international industry and government executives. SINET is well known for our coveted and unparalleled networking opportunities.

Learn more at www.security-innovation.org

COMMUNITY BUILDING

SINET—where the business of Cybersecurity takes place—builds communities of interest and trust, connects thought leaders in government and industry with builders, buyers, researchers and investors across the international security domain with the goal of promoting and advancing Cybersecurity innovation. We are passionate about our mission and strive to build a community that engenders a sense of common duty, purpose and commitment to protect our critical infrastructure and help to preserve economic stability.

Join our community and participate in our mutually beneficial, trust-based approach that connects the ecosystem of the entrepreneur, increases business opportunities and advances Cybersecurity innovation.

Join the SINET community at www.security-innovation.org/community.htm

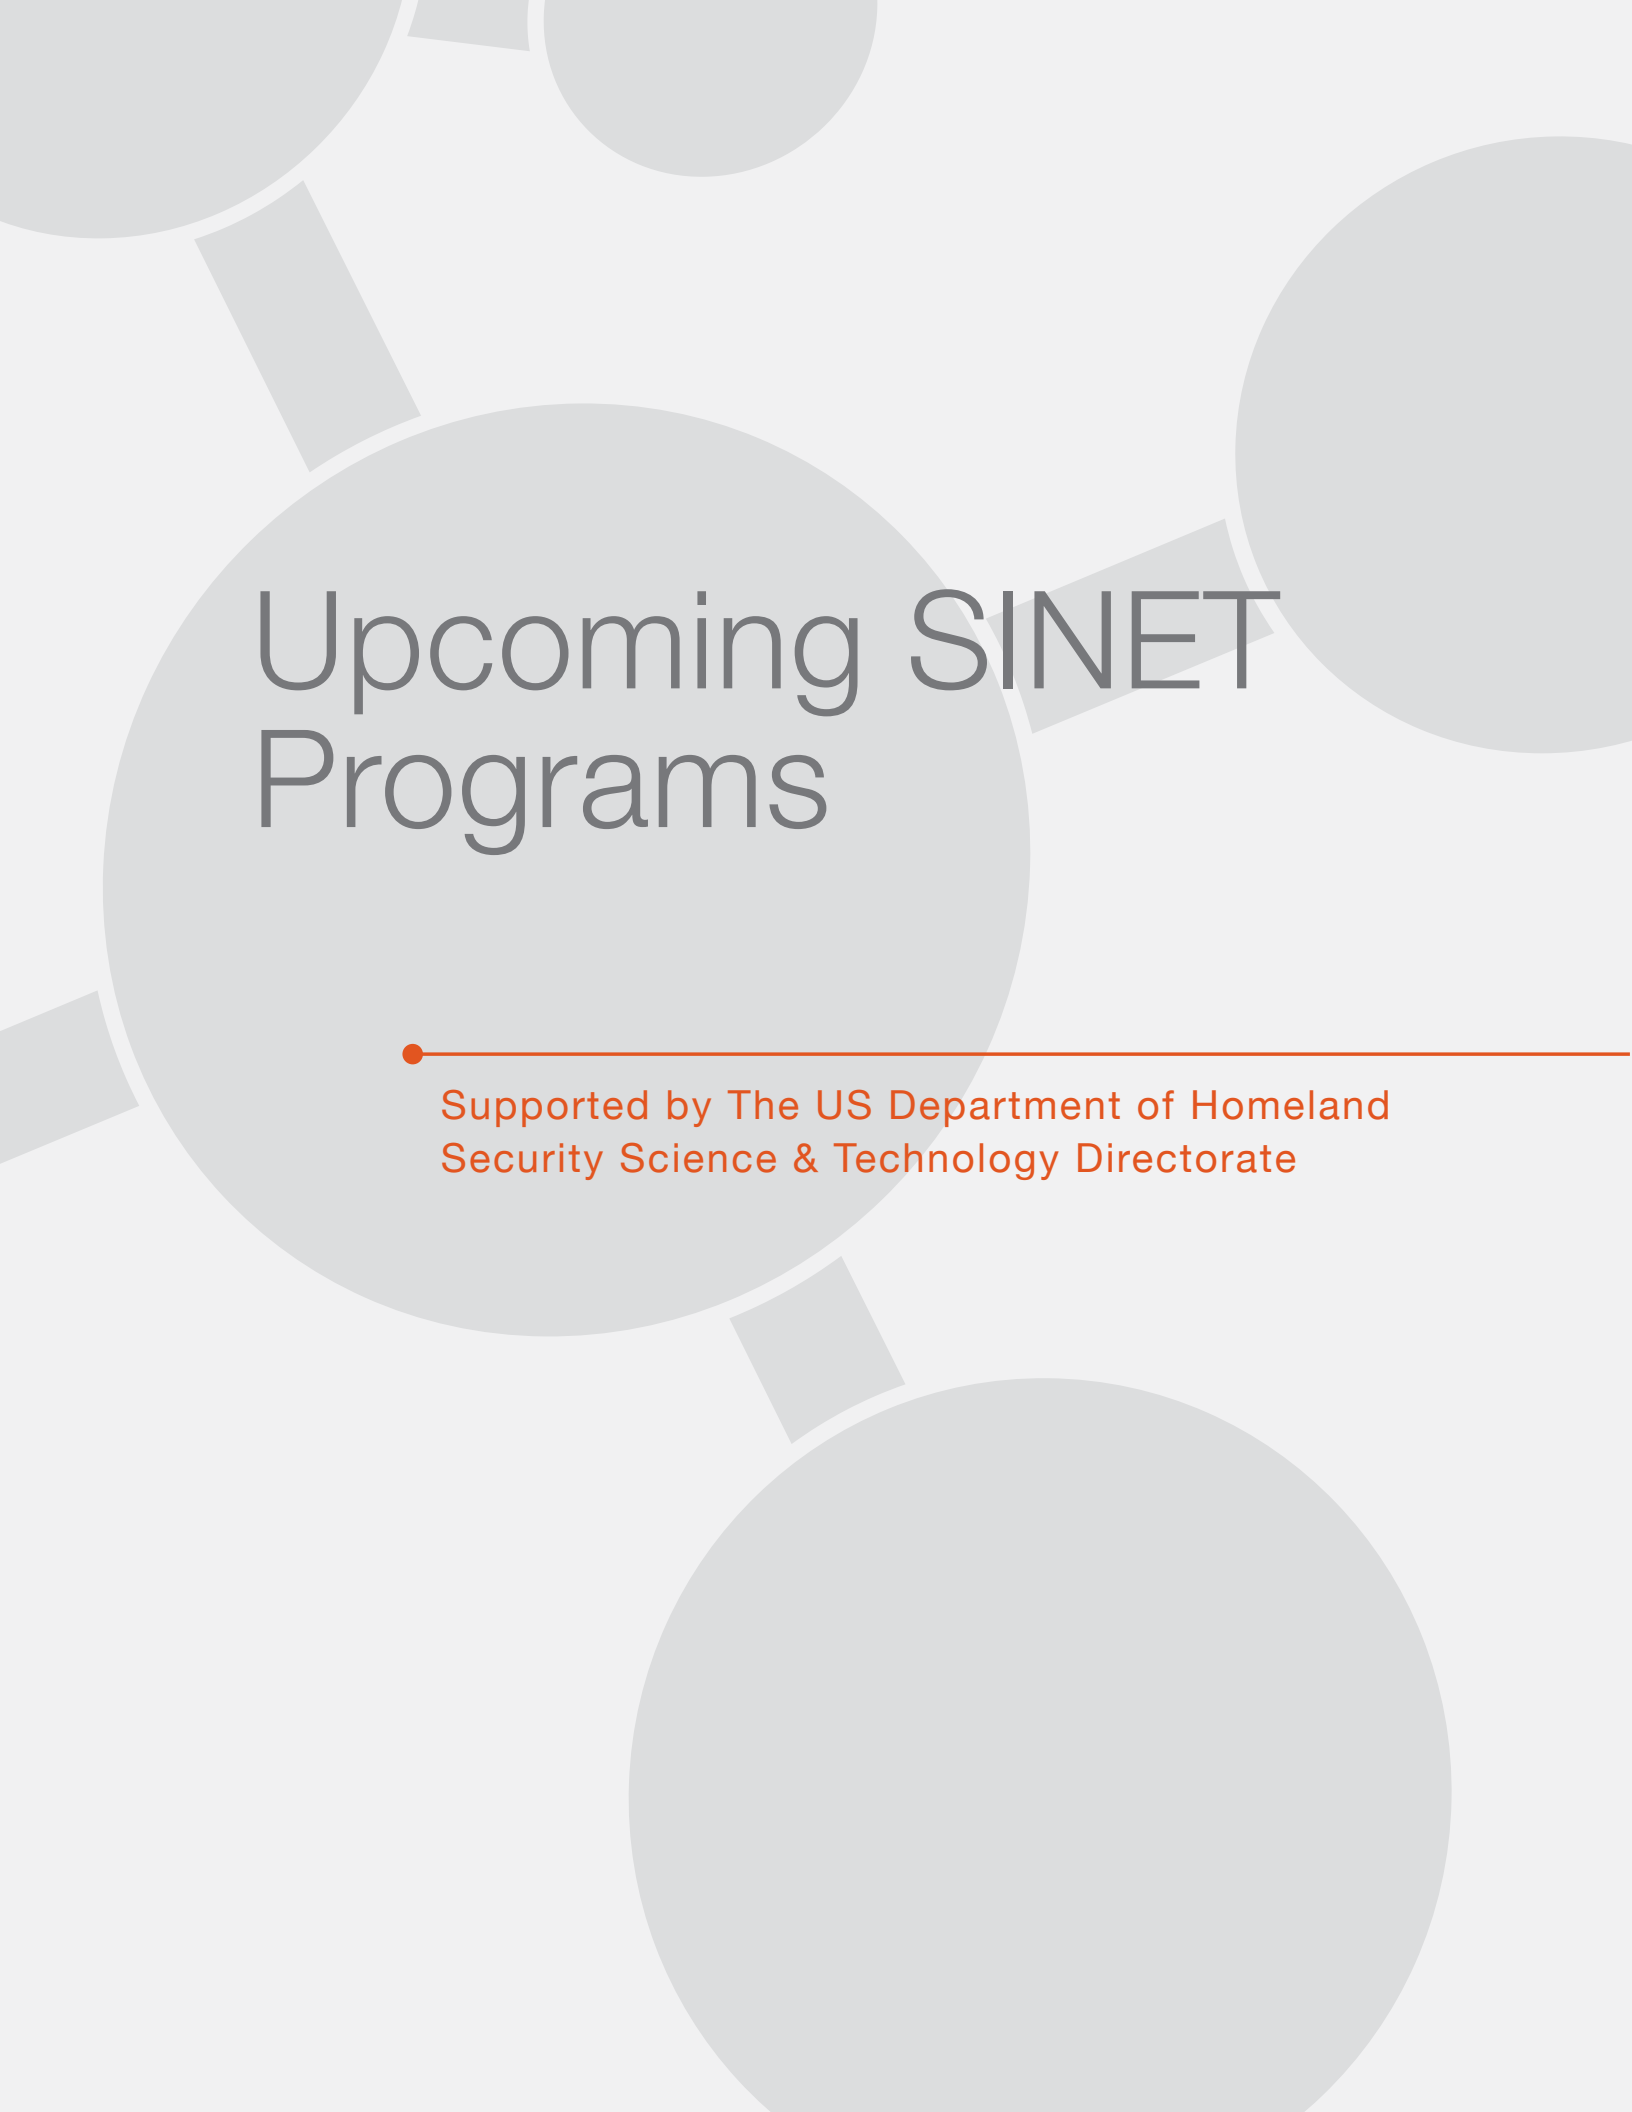

MEMBERSHIP

The SINET Showcase is just one of the many resources available to the SINET community. By becoming a member, you will gain access to additional benefits and discounted services that can take your company to the next level. Many of your peers have already discovered that SINET is the Cybersecurity “super connector” that enables them to exchange knowledge, learn from industry experts, advance innovation, and build networks with investors, entrepreneurs, government agencies, military, corporate enterprises and more.

Together, we can make a difference.

Become a SINET member and help contribute to our mission of advancing the business of Cyber.

Upcoming SINET Programs

Supported by The US Department of Homeland
Security Science & Technology Directorate

Upcoming SINET Programs

SINET Global Institute—CISO Series

January 11 & 12, 2017—Invitation Only
The Four Seasons Hotel, Scottsdale At Troon North

SINET is hosting their third Global Institute CISO Series workshop in Scottsdale, Arizona.

Designed by CISO/CIRO/CSOs from Fortune 500, FTSE 100, TSX 100 and ASX 100 level corporations who develop the content and structure for a thought leadership discussion on *How Cyber is Driving the New Board Perspective on Enterprise Risk Management*. This invite only workshop will also take place in Vail, Colorado in the Fall of 2017 and centers around enhancing a better understanding and communications between CISOs and their Board of Directors. Presentations and discussions will be on; what are the challenges that BODs are placing on security and risk executives and how are they managing and communicating today's enterprise and organizational risks. This workshop is invitation only.

IT Security Entrepreneurs Forum 2017

March 28 & 29, 2017
Computer History Museum, Silicon Valley

ITSEF is our flagship event designed to bridge the gap between the Federal Government, Silicon Valley and other centers of innovation. The Forum provides a venue where entrepreneurs can interface directly with top government agency and industry officials. SINET consistently attracts the world's top Cybersecurity professionals to participate each year.

SINET presents

The Global Cybersecurity Innovation Summit 2017

Supported by Her Majesty's Government & US Department of Homeland Security, Science & Technology Directorate

May 16 & 17, 2017
The British Museum, London

The Global Cybersecurity Innovation Summit objective is to advance innovation and the growth of the Cybersecurity sector by providing a platform for Cybersecurity businesses, particularly Small and Medium Enterprises (SMEs), to connect with key UK, US, and International decision makers, system integrators, investors, Government policy makers, academia and other influential business executives. Last year's event sold out. Register early to secure your spot.

Innovation Summit 2017—New York, NY

June 20, 2017
The TimesCenter

Innovation Summit connects America's three most powerful epicenters—Wall Street, Silicon Valley and Washington, DC—and promotes the importance of industry and government collaboration. The summit is designed to reinvigorate public-private partnership efforts between disparate communities and accelerate the business of Cybersecurity between investors, builders and buyers.

SINET61 2017—Sydney, Australia Supported by Data61

September 2017

SINET61 brings together disparate industry leaders, investors, researchers, and governments to create a global Cybersecurity network that supports the national strategy for Australia's Cybersecurity industry to become the Asia Pacific and International leader to attract investment and global commerce.
